First 3D cartoon set in Genoa. It takes place in the Ancient Pier and tells the story of an old dockworker, Gioannin, who lives in Vico del Molo ("Pier Alley") and loves to stroll along the places of old times, sitting on the benches in the square where the Bigo is now, and where the Acquarius and the Piano Sphere can be seen at a distance. The story begins when a child, curious about the clinking of a "lattice", the typical identification metal label used by the dockworkers of the previous century, asks the old docker to tell him what it is. From this moment on, a journey back in time unveiling the port of Genoa takes place. The cartoon is produced by Art Five.
